

Aden Oak in a modern farmhouse room

Aden Oak, from the COREtec Originals Enhanced line, is a mid dark vinyl plank with a soft greige undertone (measured from its own picture: LRV 19). Here it is with Pure White walls, Alabaster trim and Cloud White on the cabinets, chosen by the numbers.

THE PALETTE

THE FLOOR	WALLS	TRIM	CABINETS	WOOD
Aden Oak LRV 19	Pure White Sherwin-Williams SW 7005 LRV 84	Alabaster Sherwin-Williams SW 7008 LRV 82.2	Cloud White Benjamin Moore OC-130 LRV 85.1	A charcoal wood Like our Ebony stain sample

WALLS, TRIM AND CABINETS

WALLS

Pure White

Sherwin-Williams SW 7005 · LRV 84 · +65 from the floor
A warm white or greige in the same soft family as Aden Oak (hue 103° against its 83°).

OR WALLS

Simply White

Benjamin Moore OC-117 · LRV 89.5 · +71 from the floor
A warm white or greige in the same soft family as Aden Oak (hue 110° against its 83°).

TRIM AND CEILINGS

Alabaster

Sherwin-Williams SW 7008 · LRV 82.2 · +63 from the floor
63 points over Aden Oak in LRV and warm enough (chroma 5.3) to read white, not blue, beside its greige undertone.

CABINETS

Cloud White

Benjamin Moore OC-130 · LRV 85.1 · +66 from the floor
A light color with some life in it, so cabinets float off Aden Oak (a 66 point step in LRV).

Cabinets in Cloud White or Alabaster: a dark floor needs light cabinets to float above it.

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
19	51	Greige	83°

A greige: soft gray with a little warmth. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Aden Oak is lighter than 33 percent of the 1,197 vinyl floors we carry, measured the same way, and warmer than 23 percent of them.

WOOD, RUGS AND METALS

**A step darker: a charcoal wood**

About 22 points darker than Aden Oak in L* (29 against 51), far enough to read as a choice. Like our Ebony stain sample.

**A step lighter: a pale, bleached wood**

About 17 points lighter than Aden Oak in L* (67 against 51). Like our Natural stain sample.

**Tone on tone: fog gray**

4 in chroma, half the warmth of Aden Oak (8), and 28 points lighter in L*.

**Across the wheel: graphite**

Hue 263°, straight across the color wheel from the 83° of Aden Oak, softened to balance it.

**Grounding: charcoal**

A deep note at L* 21, 30 points from the 51 of Aden Oak, so a rug keeps its edge.

**Matte black**

Black works with every undertone; beside Aden Oak at LRV 19 it gives the room its outline.

**Champagne bronze**

A warm metal that agrees with the greige undertone of Aden Oak (hue 83°).

**Brushed nickel**

A soft satin nickel, quieter than chrome, for the greige of Aden Oak.

ROOM BY ROOM

- **Living room** Pure White walls and Alabaster trim, a fog gray rug with a charcoal edge on Aden Oak, a coffee table in a charcoal wood.
- **Kitchen** Cabinets in Cloud White so they float off Aden Oak, Alabaster walls and trim, champagne bronze pulls.
- **Dining room** A table in a charcoal wood on Aden Oak, chairs in a pale, bleached wood, champagne bronze pendants.
- **Bedroom** Simply White walls, fog gray linen, a graphite quilt, brushed nickel on the lamps.

WHAT TO AVOID

- Walls at the lightness of Aden Oak: Gauntlet Gray (Sherwin-Williams SW 7019, LRV 17.4) sits within a point of its LRV of 19, so wall and floor would blur into one.
- Wood that almost matches Aden Oak: a tone like our Warm Gray sample, 5.6 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Stark blue whites everywhere: a greige floor like Aden Oak turns muddy beside them. Keep the whites a little warm.

THE ROOM IT SUITS

At LRV 19, Aden Oak is mid dark: it is at its best in a big room with good light and warm lamps, and it shows dust, pet hair and fine scratches more than a mid tone.

At 7 inches a board, Aden Oak lays about 21 boards across a 12 foot room, so the room reads open with few seams.

Aden Oak is waterproof, so it belongs in kitchens, baths, mudrooms and basements as well as living spaces.

Wear layer: 20 mil

Core: WPC, a wood plastic composite core

Finish: UV Acrylic
