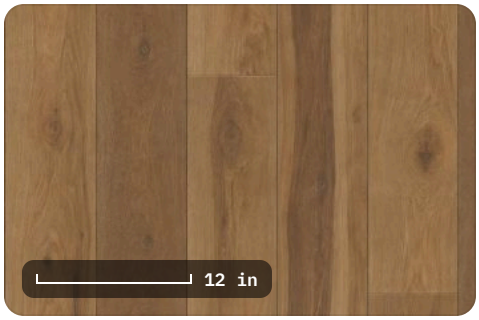
Blended Sienna in a warm modern room

Blended Sienna from the COREtec Originals Premium line is a mid dark vinyl plank with a golden undertone (measured from its own picture: LRV 17). Here it is with Colonnade Gray walls, Alabaster trim, and Upward on the cabinets, chosen by the numbers.



THE PALETTE

THE FLOOR	WALLS	TRIM	CABINETS	WOOD
Blended Sienna LRV 17	**Colonnade Gray** Sherwin-Williams SW 7641 LRV 53	**Alabaster** Sherwin-Williams SW 7008 LRV 82.2	**Upward** Sherwin-Williams SW 6239 LRV 57.4	**A charcoal wood** Like our Ebony stain sample

WALLS, TRIM AND CABINETS

WALLS
Colonnade Gray
Sherwin-Williams SW 7641 · LRV 53 · +36 from the floor
A soft neutral with a touch of warmth (hue 87°), so Blended Sienna stays golden without turning yellow.

OR WALLS
Revere Pewter
Benjamin Moore HC-172 · LRV 55.1 · +38 from the floor
A soft neutral with a touch of warmth (hue 95°), so Blended Sienna stays golden without turning yellow.

TRIM AND CEILINGS
Alabaster
Sherwin-Williams SW 7008 · LRV 82.2 · +66 from the floor
66 points over Blended Sienna in LRV and warm enough (chroma 5.3) to read white, not blue, beside its golden undertone.

CABINETS
Upward
Sherwin-Williams SW 6239 · LRV 57.4 · +41 from the floor
A light color with some life in it, so cabinets float off Blended Sienna (a 41 point step in LRV).

Cabinets in Upward or Alabaster: a dark floor needs light cabinets to float above it.

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
17	48	Golden	70°

A golden undertone, warm without leaning red. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Blended Sienna is lighter than 29 percent of the 1,206 vinyl floors we carry, measured the same way, and warmer than 95 percent of them.

WOOD, RUGS AND METALS

A step darker: a charcoal wood
About 19 points darker than Blended Sienna in L* (29 against 48), far enough to read as a choice. Like our Ebony stain sample.

A step lighter: a light natural wood
About 13 points lighter than Blended Sienna in L* (61 against 48). Like our Silvered Gray stain sample.

Tone on tone: putty
12 in chroma, half the warmth of Blended Sienna (26), and 28 points lighter in L*.

Across the wheel: mist blue
Hue 250°, straight across the color wheel from the 70° of Blended Sienna, softened to balance it.

Grounding: espresso
A deep note at L* 20, 28 points from the 48 of Blended Sienna, so a rug keeps its edge.

Aged brass
A warm metal that agrees with the golden undertone of Blended Sienna (hue 70°).

Unlacquered brass
Left unsealed, it darkens with handling to a softer warm tone beside Colonnade Gray walls.

Matte black
Black works with every undertone; beside Blended Sienna at LRV 17 it gives the room its outline.

ROOM BY ROOM

- **Living room** Colonnade Gray walls and Alabaster trim around Blended Sienna, a putty rug with an espresso border, a coffee table in a charcoal wood, aged brass lamps.
- **Kitchen** Cabinets in Upward so they float off Blended Sienna, Alabaster walls and trim, unlacquered brass pulls.
- **Bedroom** Revere Pewter walls, bedding in putty with one mist blue pillow, nightstands in a light natural wood.
- **Entry** An espresso runner on Blended Sienna, Upward on the front door, a matte black mirror.

WHAT TO AVOID

- Walls at the lightness of Blended Sienna: Sage Green Light (Sherwin-Williams SW 2851, LRV 16.1) sits within a point of its LRV of 17, so wall and floor would blur into one.
- Wood that almost matches Blended Sienna: a tone like our Golden Oak sample, 4.2 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Walls that lean yellow: yellow on yellow flattens the golden undertone of Blended Sienna (hue 70°).

THE ROOM IT SUITS

At LRV 17, Blended Sienna is mid dark: it is at its best in a big room with good light and warm lamps, and it shows dust, pet hair and fine scratches more than a mid tone.

At 7 inches a board, Blended Sienna lays about 21 boards across a 12 foot room, so the room reads open with few seams.

Blended Sienna is waterproof, so it belongs in kitchens, baths, mudrooms and basements as well as living spaces.

Wear layer: 20 mil

Core: WPC, a wood plastic composite core

Finish: UV Acrylic
