Batik in a dark and moody room

Batik from the Fifth and Main Symbiotic 20 line is a dark vinyl plank with a warm greige undertone (LRV 10, measured from its own picture). Here it's shown with Thunder walls, Swiss Coffee trim, and Stonington Gray cabinets, chosen by the numbers.

THE PALETTE

THE FLOOR	WALLS	TRIM	CABINETS	WOOD
Batik LRV 10	**Thunder** Benjamin Moore AF-685 LRV 47.6	**Swiss Coffee** Benjamin Moore OC-45 LRV 81.9	**Stonington Gray** Benjamin Moore HC-170 LRV 59.4	**A charcoal wood** Like our True Black stain sample

WALLS, TRIM AND CABINETS

WALLS
Thunder
Benjamin Moore AF-685 · LRV 47.6 · +38 from the floor
A warm white or greige in the same soft family as Batik (hue 92° against its 67°).

OR WALLS
Repose Gray
Sherwin-Williams SW 7015 · LRV 58.2 · +48 from the floor
A warm white or greige in the same soft family as Batik (hue 97° against its 67°).

TRIM AND CEILINGS
Swiss Coffee
Benjamin Moore OC-45 · LRV 81.9 · +72 from the floor
72 points over Batik in LRV and warm enough (chroma 5.7) to read white, not blue, beside its greige undertone.

CABINETS
Stonington Gray
Benjamin Moore HC-170 · LRV 59.4 · +50 from the floor
A light color with some life in it, so cabinets float off Batik (a 50 point step in LRV).

Cabinets in Stonington Gray or Swiss Coffee: a dark floor needs light cabinets to float above it.

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
10	38	Greige	67°

A warm greige: gray with a little brown in it. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Batik is lighter than 13 percent of the 1,204 vinyl floors we carry, measured the same way, and warmer than 30 percent of them.

WOOD, RUGS AND METALS

A step darker: a charcoal wood
About 16 points darker than Batik in L* (21 against 38), far enough to read as a choice. Like our True Black stain sample.

A step lighter: a honey tone
About 16 points lighter than Batik in L* (53 against 38). Like our Golden Pecan stain sample.

Tone on tone: stone gray
4 in chroma, half the warmth of Batik (10), and 28 points lighter in L*.

Across the wheel: mist blue
Hue 247°, straight across the color wheel from the 67° of Batik, softened to balance it.

Grounding: fog gray
A light note at L* 83, 45 points from the 38 of Batik, so a rug keeps its edge.

Aged brass
A warm metal that agrees with the greige undertone of Batik (hue 67°).

Champagne bronze
A paler warm metal, quieter than brass beside Thunder and Swiss Coffee.

Brushed nickel
A soft satin nickel, quieter than chrome, for the greige of Batik.

ROOM BY ROOM

- **Living room** Thunder walls and Swiss Coffee trim over Batik, velvet in stone gray with a mist blue pillow, aged brass lamps on low.
- **Kitchen** Cabinets in Stonington Gray so they float off Batik, Swiss Coffee walls and trim, champagne bronze pulls.
- **Bedroom** Repose Gray walls, stone gray bedding, nightstands in a honey tone, brushed nickel on the lamps.
- **Entry** A fog gray runner on Batik, Stonington Gray on the door, a champagne bronze mirror.

WHAT TO AVOID

- Walls at the lightness of Batik: Peppercorn (Sherwin-Williams SW 7674, LRV 9.7) sits within a point of its LRV of 10, so wall and floor would blur into one.
- Wood that almost matches Batik: a tone like our Heritage Brown sample, 2.7 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Stark blue whites everywhere: a greige floor like Batik turns muddy beside them. Keep the whites a little warm.

THE ROOM IT SUITS

At LRV 10, Batik is dark: it is at its best in a big room with good light and warm lamps, and it shows dust, pet hair and fine scratches more than a mid tone.

At 6 inches a board, Batik lays about 24 boards across a 12 foot room.

Living spaces and bedrooms; ask us about wet rooms.

Wear layer: 20 mil

Finish: ExoGuard+®
