Boheme Brown in a dark and moody room

Boheme Brown, from the Shaw Floors Infinite 8 line, is a dark vinyl plank with a soft greige undertone (measured from its own picture: LRV 10). Here it is with Amazing Gray walls, Alabaster trim and Gray Owl on the cabinets, chosen by the numbers.

THE PALETTE

THE FLOOR	WALLS	TRIM	CABINETS	WOOD
Boheme Brown LRV 10	**Amazing Gray** Sherwin-Williams SW 7044 LRV 46.9	**Alabaster** Sherwin-Williams SW 7008 LRV 82.2	**Gray Owl** Benjamin Moore OC-52 LRV 64.5	**A charcoal wood** Like our True Black stain sample

WALLS, TRIM AND CABINETS

WALLS
Amazing Gray
Sherwin-Williams SW 7044 · LRV 46.9 · +37 from the floor
A warm white or greige in the same soft family as Boheme Brown (hue 81° against its 75°).

OR WALLS
Thunder
Benjamin Moore AF-685 · LRV 47.6 · +38 from the floor
A warm white or greige in the same soft family as Boheme Brown (hue 92° against its 75°).

TRIM AND CEILINGS
Alabaster
Sherwin-Williams SW 7008 · LRV 82.2 · +73 from the floor
73 points over Boheme Brown in LRV and warm enough (chroma 5.3) to read white, not blue, beside its greige undertone.

CABINETS
Gray Owl
Benjamin Moore OC-52 · LRV 64.5 · +55 from the floor
A light color with some life in it, so cabinets float off Boheme Brown (a 55 point step in LRV).

Cabinets in Gray Owl or Alabaster: a dark floor needs light cabinets to float above it.

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
10	37	Greige	75°

A greige: soft gray with a little warmth. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Boheme Brown is lighter than 12 percent of the 1,206 vinyl floors we carry, measured the same way, and warmer than 28 percent of them.

WOOD, RUGS AND METALS

A step darker: a charcoal wood
About 16 points darker than Boheme Brown in L* (21 against 37), far enough to read as a choice. Like our True Black stain sample.

A step lighter: a honey tone
About 15 points lighter than Boheme Brown in L* (52 against 37). Like our Fruitwood stain sample.

Tone on tone: stone gray
4 in chroma, half the warmth of Boheme Brown (9), and 28 points lighter in L*.

Across the wheel: mist blue
Hue 255°, straight across the color wheel from the 75° of Boheme Brown, softened to balance it.

Grounding: fog gray
A light note at L* 82, 45 points from the 37 of Boheme Brown, so a rug keeps its edge.

Aged brass
A warm metal that agrees with the greige undertone of Boheme Brown (hue 75°).

Champagne bronze
A paler warm metal, quieter than brass beside Amazing Gray and Alabaster.

Brushed nickel
A soft satin nickel, quieter than chrome, for the greige of Boheme Brown.

ROOM BY ROOM

- **Living room** Amazing Gray walls and Alabaster trim over Boheme Brown, velvet in stone gray with a mist blue pillow, aged brass lamps on low.
- **Kitchen** Cabinets in Gray Owl so they float off Boheme Brown, Alabaster walls and trim, champagne bronze pulls.
- **Bedroom** Thunder walls, stone gray bedding, nightstands in a honey tone, brushed nickel on the lamps.
- **Entry** A fog gray runner on Boheme Brown, Gray Owl on the door, a champagne bronze mirror.

WHAT TO AVOID

- Walls at the lightness of Boheme Brown: Peppercorn (Sherwin-Williams SW 7674, LRV 9.7) sits within a point of its LRV of 10, so wall and floor would blur into one.
- Wood that almost matches Boheme Brown: a tone like our Heritage Brown sample, 2.9 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Stark blue whites everywhere: a greige floor like Boheme Brown turns muddy beside them. Keep the whites a little warm.

THE ROOM IT SUITS

At LRV 10, Boheme Brown is dark: it is at its best in a big room with good light and warm lamps, and it shows dust, pet hair and fine scratches more than a mid tone.

At 7 inches a board, Boheme Brown lays about 21 boards across a 12 foot room, so the room reads open with few seams.

Living spaces and bedrooms; ask us about wet rooms.

Wear layer: 8 mil

Finish: ArmourBead®
