Bronzite in a dark and moody room

Bronzite, from the Fifth and Main Symbiotic 20 line, is a dark vinyl plank with a warm greige undertone (measured from its own picture: LRV 9). Here it is with Amazing Gray walls, Alabaster trim and Extra White on the cabinets, chosen by the numbers.

THE PALETTE

THE FLOOR	WALLS	TRIM	CABINETS	WOOD
Bronzite LRV 9	**Amazing Gray** Sherwin-Williams SW 7044 LRV 46.9	**Alabaster** Sherwin-Williams SW 7008 LRV 82.2	**Extra White** Sherwin-Williams SW 7006 LRV 85.9	**A honey tone** Like our Golden Oak stain sample

WALLS, TRIM AND CABINETS

WALLS
Amazing Gray
Sherwin-Williams SW 7044 · LRV 46.9 · +38 from the floor
A warm white or greige in the same soft family as Bronzite (hue 81° against its 66°).

OR WALLS
Thunder
Benjamin Moore AF-685 · LRV 47.6 · +39 from the floor
A warm white or greige in the same soft family as Bronzite (hue 92° against its 66°).

TRIM AND CEILINGS
Alabaster
Sherwin-Williams SW 7008 · LRV 82.2 · +74 from the floor
74 points over Bronzite in LRV and warm enough (chroma 5.3) to read white, not blue, beside its greige undertone.

CABINETS
Extra White
Sherwin-Williams SW 7006 · LRV 85.9 · +77 from the floor
A light color with some life in it, so cabinets float off Bronzite (a 77 point step in LRV).

Cabinets in Extra White or Alabaster: a dark floor needs light cabinets to float above it.

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
9	35	Greige	66°

A warm greige: gray with a little brown in it. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Bronzite is lighter than 8 percent of the 1,204 vinyl floors we carry, measured the same way, and warmer than 21 percent of them.

WOOD, RUGS AND METALS

A step lighter: a honey tone
About 17 points lighter than Bronzite in L* (51 against 35). Like our Golden Oak stain sample.

Tone on tone: stone gray
4 in chroma, half the warmth of Bronzite (8), and 28 points lighter in L*.

Across the wheel: mist blue
Hue 246°, straight across the color wheel from the 66° of Bronzite, softened to balance it.

Grounding: fog gray
A light note at L* 80, 45 points from the 35 of Bronzite, so a rug keeps its edge.

Aged brass
A warm metal that agrees with the greige undertone of Bronzite (hue 66°).

Champagne bronze
A paler warm metal, quieter than brass beside Amazing Gray and Alabaster.

Brushed nickel
A soft satin nickel, quieter than chrome, for the greige of Bronzite.

ROOM BY ROOM

- **Living room** Amazing Gray walls and Alabaster trim over Bronzite, velvet in stone gray with a mist blue pillow, aged brass lamps on low.
- **Kitchen** Cabinets in Extra White so they float off Bronzite, Alabaster walls and trim, champagne bronze pulls.
- **Bedroom** Thunder walls, stone gray bedding, nightstands in a honey tone, brushed nickel on the lamps.
- **Entry** A fog gray runner on Bronzite, Extra White on the door, a champagne bronze mirror.

WHAT TO AVOID

- Walls at the lightness of Bronzite: Hale Navy (Benjamin Moore HC-154, LRV 8.4) sits within a point of its LRV of 9, so wall and floor would blur into one.
- Wood that almost matches Bronzite: a tone like our Heritage Brown sample, 0.5 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Stark blue whites everywhere: a greige floor like Bronzite turns muddy beside them. Keep the whites a little warm.

THE ROOM IT SUITS

At LRV 9, Bronzite is dark: it is at its best in a big room with good light and warm lamps, and it shows dust, pet hair and fine scratches more than a mid tone.

At 6 inches a board, Bronzite lays about 24 boards across a 12 foot room.

Living spaces and bedrooms; ask us about wet rooms.

Wear layer: 20 mil

Finish: ExoGuard+®
