Cambrena in a traditional room

Cambrena, from the Anderson Tuftex Bernina Hickory line, is a dark hickory hardwood with an amber undertone (LRV 11, measured from its own picture). Here it is with Sea Salt walls, Alabaster trim, and Upward on the cabinets, chosen by the numbers.

THE PALETTE

THE FLOOR	WALLS	TRIM	CABINETS	WOOD
Cambrena LRV 11	**Sea Salt** Sherwin-Williams SW 6204 LRV 63.2	**Alabaster** Sherwin-Williams SW 7008 LRV 82.2	**Upward** Sherwin-Williams SW 6239 LRV 57.4	**A charcoal wood** Like our True Black stain sample

WALLS, TRIM AND CABINETS

WALLS
Sea Salt
Sherwin-Williams SW 6204 · LRV 63.2 · +52 from the floor
Its undertone leans green (hue 133°), which quiets the orange in Cambrena (hue 66°) instead of echoing it.

OR WALLS
Palladian Blue
Benjamin Moore HC-144 · LRV 60.4 · +50 from the floor
Its undertone leans green (hue 163°), which quiets the orange in Cambrena (hue 66°) instead of echoing it.

TRIM AND CEILINGS
Alabaster
Sherwin-Williams SW 7008 · LRV 82.2 · +71 from the floor
71 points over Cambrena in LRV and warm enough (chroma 5.3) to read white, not blue, beside its amber undertone.

CABINETS
Upward
Sherwin-Williams SW 6239 · LRV 57.4 · +47 from the floor
A light color with some life in it, so cabinets float off Cambrena (a 47 point step in LRV).

Cabinets in Upward or Alabaster: a dark floor needs light cabinets to float above it.

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
11	39	Amber	66°

An amber undertone, warm and a little orange. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Cambrena is lighter than 31 percent of the 1,739 hardwood floors we carry, measured the same way, and warmer than 19 percent of them.

WOOD, RUGS AND METALS

A step darker: a charcoal wood
About 18 points darker than Cambrena in L* (21 against 39), far enough to read as a choice. Like our True Black stain sample.

A step lighter: a light natural wood
About 16 points lighter than Cambrena in L* (56 against 39). Like our Weathered Oak stain sample.

Tone on tone: stone gray
7 in chroma, half the warmth of Cambrena (15), and 28 points lighter in L*.

Across the wheel: mist blue
Hue 246°, straight across the color wheel from the 66° of Cambrena, softened to balance it.

Grounding: fog gray
A light note at L* 84, 45 points from the 39 of Cambrena, so a rug keeps its edge.

Unlacquered brass
A warm metal that agrees with the amber undertone of Cambrena (hue 66°).

Aged brass
A second warm metal in a worn finish, so the brass beside Sea Salt walls never looks new and loud.

Matte black
Black works with every undertone; beside Cambrena at LRV 11 it gives the room its outline.

ROOM BY ROOM

- **Living room** Sea Salt walls, Alabaster trim and crown, a patterned rug in mist blue and fog gray on Cambrena, furniture in a charcoal wood, unlacquered brass lamps.
- **Kitchen** Cabinets in Upward so they float off Cambrena, Alabaster walls and trim, aged brass pulls.
- **Dining room** Palladian Blue walls, a table in a charcoal wood, chairs in stone gray, an unlacquered brass chandelier.
- **Bedroom** Sea Salt walls, stone gray bedding, a mist blue throw, nightstands in a light natural wood.

WHAT TO AVOID

- Walls at the lightness of Cambrena: Newburg Green (Benjamin Moore HC-158, LRV 10.6) sits within a point of its LRV of 11, so wall and floor would blur into one.
- Wood that almost matches Cambrena: a tone like our Aged Barrel sample, 4.2 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Pink or peach beige walls: they pull more orange out of the amber undertone of Cambrena (hue 66°).

THE ROOM IT SUITS

At LRV 11, Cambrena is dark: it is at its best in a big room with good light and warm lamps, and it shows dust, pet hair and fine scratches more than a mid tone.

At 5 inches a board, Cambrena lays about 29 boards across a 12 foot room.

Engineered hardwood: living spaces and bedrooms on every level, kept out of full baths.

Hardness: Hickory: Janka 1,820 lbf

Construction: Engineered
