

Chapman in a warm modern room

Chapman, from the Shaw Floors Allegiance + Acc line, is a mid dark vinyl plank with a warm greige undertone (measured from its own picture: LRV 13). Here it is with Revere Pewter walls, Swiss Coffee trim, and Stonington Gray cabinets, chosen by the numbers.

THE PALETTE

THE FLOOR	WALLS	TRIM	CABINETS	WOOD

WALLS, TRIM AND CABINETS

WALLS

Revere Pewter

Benjamin Moore HC-172 • LRV 55.1 • +42 from the floor

A warm white or greige in the same soft family as Chapman (hue 95° against its 57°).

OR WALLS

Dover White

Sherwin-Williams SW 6385 • LRV 82.5 • +69 from the floor

A warm white or greige in the same soft family as Chapman (hue 93° against its 57°).

TRIM AND CEILINGS

Swiss Coffee

Benjamin Moore OC-45 • LRV 81.9 • +69 from the floor

69 points over Chapman in LRV and warm enough (chroma 5.7) to read white, not blue, beside its greige undertone.

CABINETS

Stonington Gray

Benjamin Moore HC-170 • LRV 59.4 • +46 from the floor

A light color with some life in it, so cabinets float off Chapman (a 46 point step in LRV).

Cabinets in Stonington Gray or Swiss Coffee: a dark floor needs light cabinets to float above it.

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
13	43	Greige	57°

A warm greige: gray with a little brown in it. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Chapman is lighter than 21 percent of the 1,198 vinyl floors we carry, measured the same way, and warmer than 37 percent of them.

WOOD, RUGS AND METALS

**A step darker: a charcoal wood**

About 14 points darker than Chapman in L* (29 against 43), far enough to read as a choice. Like our Ebony stain sample.

**A step lighter: a light natural wood**

About 18 points lighter than Chapman in L* (61 against 43). Like our Silvered Gray stain sample.

**Tone on tone: dove gray**

5 in chroma, half the warmth of Chapman (11), and 28 points lighter in L*.

**Across the wheel: mist blue**

Hue 237°, straight across the color wheel from the 57° of Chapman, softened to balance it.

**Grounding: charcoal**

A deep note at L* 20, 23 points from the 43 of Chapman, so a rug keeps its edge.

**Aged brass**

A warm metal that agrees with the greige undertone of Chapman (hue 57°).

**Champagne bronze**

A paler warm metal, quieter than brass beside Revere Pewter and Swiss Coffee.

**Brushed nickel**

A soft satin nickel, quieter than chrome, for the greige of Chapman.

ROOM BY ROOM

- **Living room** Revere Pewter walls and Swiss Coffee trim around Chapman, a dove gray rug with a charcoal border, a coffee table in a charcoal wood, aged brass lamps.
- **Kitchen** Cabinets in Stonington Gray so they float off Chapman, Swiss Coffee walls and trim, champagne bronze pulls.
- **Bedroom** Dover White walls, bedding in dove gray with one mist blue pillow, nightstands in a light natural wood.
- **Entry** A charcoal runner on Chapman, Stonington Gray on the front door, a brushed nickel mirror.

WHAT TO AVOID

- Walls at the lightness of Chapman: Rosemary (Sherwin-Williams SW 6187, LRV 13.6) sits within a point of its LRV of 13, so wall and floor would blur into one.
- Wood that almost matches Chapman: a tone like our Aged Barrel sample, 2.4 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Stark blue whites everywhere: a greige floor like Chapman turns muddy beside them. Keep the whites a little warm.

THE ROOM IT SUITS

At LRV 13, Chapman is mid dark: it is at its best in a big room with good light and warm lamps, and it shows dust, pet hair and fine scratches more than a mid tone.

At 7 inches a board, Chapman lays about 21 boards across a 12 foot room, so the room reads open with few seams.

Chapman is waterproof, so it belongs in kitchens, baths, mudrooms and basements as well as living spaces.

Wear layer: 20 mil**Core:** SPC, a rigid stone polymer core**Finish:** ScufResist®
