Coconut Grove in a Japandi room

Coconut Grove, from the Shaw Floors Oak Crest line, is a light laminate with a golden undertone (LRV 51, measured from its own picture). It pairs with Snowbound walls, Greek Villa trim, and Sage Green Light as the deep note, chosen by the numbers.

THE PALETTE

THE FLOOR	WALLS	TRIM	DEEP NOTE	WOOD
Coconut Grove	**Snowbound**	**Greek Villa**	**Sage Green Light**	**A light natural wood**

WALLS, TRIM AND CABINETS

WALLS
Snowbound
Sherwin-Williams SW 7004 · LRV 82.8 · +32 from the floor
A soft neutral with a touch of warmth (hue 87°), so Coconut Grove stays golden without turning yellow.

OR WALLS
Swiss Coffee
Benjamin Moore OC-45 · LRV 81.9 · +31 from the floor
A soft neutral with a touch of warmth (hue 103°), so Coconut Grove stays golden without turning yellow.

TRIM AND CEILINGS
Greek Villa
Sherwin-Williams SW 7551 · LRV 84.2 · +33 from the floor
33 points over Coconut Grove in LRV and warm enough (chroma 5.3) to read white, not blue, beside its golden undertone.

THE DEEP NOTE
Sage Green Light
Sherwin-Williams SW 2851 · LRV 16.1 · -35 from the floor
Deep and quiet, 35 points darker than Coconut Grove in LRV, a frame for a golden floor.

Lower cabinets or an island in Sage Green Light, uppers and trim in Greek Villa. The floor at LRV 51 sits between the two (16 and 84).

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
51	77	Golden	78°

A golden undertone, warm without leaning red. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Coconut Grove is lighter than 91 percent of the 45 laminate floors we carry, measured the same way, and warmer than 27 percent of them.

WOOD, RUGS AND METALS

A step darker: a light natural wood
About 21 points darker than Coconut Grove in L* (56 against 77), far enough to read as a choice. Like our Neutral stain sample.

A step lighter: black or painted pieces
Coconut Grove is lighter than any wood stain we photographed (L* 77), so contrast comes from black, painted or upholstered pieces.

Tone on tone: mocha
7 in chroma, half the warmth of Coconut Grove (16), and 34 points darker in L*.

Across the wheel: slate blue
Hue 258°, straight across the color wheel from the 78° of Coconut Grove, softened to balance it.

Grounding: pewter
A deep note at L* 47, 30 points from the 77 of Coconut Grove, so a rug keeps its edge.

Matte black
Black works with every undertone; beside Coconut Grove at LRV 51 it gives the room its outline.

Aged brass
A warm metal that agrees with the golden undertone of Coconut Grove (hue 78°).

Unlacquered brass
Left unsealed, it darkens with handling to a softer warm tone beside Snowbound walls.

ROOM BY ROOM

- **Living room** Snowbound walls and Greek Villa trim, black or painted a low table on Coconut Grove, a mocha rug, one slate blue cushion.
- **Kitchen** Greek Villa cabinets, Sage Green Light on the island or one wall, matte black pulls, Coconut Grove underfoot.
- **Bedroom** Swiss Coffee walls, a low bed in a light natural wood, mocha linen, aged brass in small doses.
- **Entry** Black or painted a bench, a pewter mat on Coconut Grove, unlacquered brass hooks.

WHAT TO AVOID

- Walls at the lightness of Coconut Grove: Colonnade Gray (Sherwin-Williams SW 7641, LRV 53) sits 2 points from its LRV of 51, so wall and floor would blur into one.
- Wood that almost matches Coconut Grove: a tone like our Country White sample, 4.5 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Walls that lean yellow: yellow on yellow flattens the golden undertone of Coconut Grove (hue 78°).

THE ROOM IT SUITS

At LRV 51, Coconut Grove is light: it bounces light back into the room, suits north facing rooms, basements and small rooms, and shows dark grit more than lint.

At 7.55 inches a board, Coconut Grove lays about 20 boards across a 12 foot room, so the room reads open with few seams.

Living spaces and bedrooms; ask us about wet rooms.
