

Elliptical Oak in a modern farmhouse room

Elliptical Oak, from the COREtec Pro Classics line, is a mid dark vinyl plank with a soft greige undertone (measured from its own picture: LRV 18). Here it is with Pale Oak walls, Swiss Coffee trim, and Balboa Mist on the cabinets, chosen by the numbers.

THE PALETTE

THE FLOOR	WALLS	TRIM	CABINETS	WOOD
Elliptical Oak LRV 18	Pale Oak Benjamin Moore OC-20 LRV 68.6	Swiss Coffee Benjamin Moore OC-45 LRV 81.9	Balboa Mist Benjamin Moore OC-27 LRV 65.5	A charcoal wood Like our Ebony stain sample

WALLS, TRIM AND CABINETS

WALLS

Pale Oak

Benjamin Moore OC-20 • LRV 68.6 • +51 from the floor
A warm white or greige in the same soft family as Elliptical Oak (hue 95° against its 76°).

OR WALLS

Dover White

Sherwin-Williams SW 6385 • LRV 82.5 • +64 from the floor
A warm white or greige in the same soft family as Elliptical Oak (hue 93° against its 76°).

TRIM AND CEILINGS

Swiss Coffee

Benjamin Moore OC-45 • LRV 81.9 • +64 from the floor
64 points over Elliptical Oak in LRV and warm enough (chroma 5.7) to read white, not blue, beside its greige undertone.

CABINETS

Balboa Mist

Benjamin Moore OC-27 • LRV 65.5 • +47 from the floor
A light color with some life in it, so cabinets float off Elliptical Oak (a 47 point step in LRV).

Cabinets in Balboa Mist or Swiss Coffee: a dark floor needs light cabinets to float above it.

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
18	50	Greige	76°

A greige: soft gray with a little warmth. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Elliptical Oak is lighter than 32 percent of the 1,197 vinyl floors we carry, measured the same way, and warmer than 29 percent of them.

WOOD, RUGS AND METALS

**A step darker: a charcoal wood**

About 21 points darker than Elliptical Oak in L* (29 against 50), far enough to read as a choice. Like our Ebony stain sample.

**A step lighter: a pale, bleached wood**

About 17 points lighter than Elliptical Oak in L* (67 against 50). Like our Natural stain sample.

**Tone on tone: fog gray**

4 in chroma, half the warmth of Elliptical Oak (10), and 28 points lighter in L*.

**Across the wheel: mist blue**

Hue 256°, straight across the color wheel from the 76° of Elliptical Oak, softened to balance it.

**Grounding: charcoal**

A deep note at L* 20, 30 points from the 50 of Elliptical Oak, so a rug keeps its edge.

**Matte black**

Black works with every undertone; beside Elliptical Oak at LRV 18 it gives the room its outline.

**Champagne bronze**

A warm metal that agrees with the greige undertone of Elliptical Oak (hue 76°).

**Brushed nickel**

A soft satin nickel, quieter than chrome, for the greige of Elliptical Oak.

ROOM BY ROOM

- **Living room** Pale Oak walls and Swiss Coffee trim, a fog gray rug with a charcoal edge on Elliptical Oak, a coffee table in a charcoal wood.
- **Kitchen** Cabinets in Balboa Mist so they float off Elliptical Oak, Swiss Coffee walls and trim, champagne bronze pulls.
- **Dining room** A table in a charcoal wood on Elliptical Oak, chairs in a pale, bleached wood, champagne bronze pendants.
- **Bedroom** Dover White walls, fog gray linen, a mist blue quilt, brushed nickel on the lamps.

WHAT TO AVOID

- Walls at the lightness of Elliptical Oak: Gauntlet Gray (Sherwin-Williams SW 7019, LRV 17.4) sits within a point of its LRV of 18, so wall and floor would blur into one.
- Wood that almost matches Elliptical Oak: a tone like our Warm Gray sample, 3.5 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Stark blue whites everywhere: a greige floor like Elliptical Oak turns muddy beside them. Keep the whites a little warm.

THE ROOM IT SUITS

At LRV 18, Elliptical Oak is mid dark: it is at its best in a big room with good light and warm lamps, and it shows dust, pet hair and fine scratches more than a mid tone.

At 7 inches a board, Elliptical Oak lays about 21 boards across a 12 foot room, so the room reads open with few seams.

Elliptical Oak is waterproof, so it belongs in kitchens, baths, mudrooms and basements as well as living spaces.

Wear layer: 20 mil

Core: SPC, a rigid stone polymer core

Finish: UV Acrylic
