Honeygrain in a modern farmhouse room

Honeygrain, from the Mullican Wexford™ 5" line, is a mid tone white oak hardwood with a golden undertone (measured from its own picture: LRV 26). It pairs with Greek Villa walls, Alabaster trim, and Wrought Iron as the deep note, chosen by the numbers.

THE PALETTE

WALLS, TRIM AND CABINETS

WALLS
Greek Villa
Sherwin-Williams SW 7551 · LRV 84.2 · +58 from the floor
A soft neutral with a touch of warmth (hue 94°), so Honeygrain stays golden without turning yellow.

OR WALLS
Simply White
Benjamin Moore OC-117 · LRV 89.5 · +64 from the floor
A soft neutral with a touch of warmth (hue 110°), so Honeygrain stays golden without turning yellow.

TRIM AND CEILINGS
Alabaster
Sherwin-Williams SW 7008 · LRV 82.2 · +56 from the floor
56 points over Honeygrain in LRV and warm enough (chroma 5.3) to read white, not blue, beside its golden undertone.

THE DEEP NOTE
Wrought Iron
Benjamin Moore 2124-10 · LRV 8.2 · -18 from the floor
Deep and quiet, 18 points darker than Honeygrain in LRV, a frame for a golden floor.

Lower cabinets or an island in Wrought Iron, uppers and trim in Alabaster. The floor at LRV 26 sits between the two (8 and 82).

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
26	58	Golden	79°

A golden undertone, warm without leaning red. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Honeygrain is lighter than 62 percent of the 1,739 hardwood floors we carry, measured the same way, and warmer than 40 percent of them.

WOOD, RUGS AND METALS

A step darker: a mid brown wood
About 20 points darker than Honeygrain in L* (38 against 58), far enough to read as a choice. Like our Chestnut stain sample.

A step lighter: a pale, bleached wood
About 14 points lighter than Honeygrain in L* (72 against 58). Like our Country White stain sample.

Tone on tone: linen
9 in chroma, half the warmth of Honeygrain (19), and 28 points lighter in L*.

Across the wheel: graphite
Hue 259°, straight across the color wheel from the 79° of Honeygrain, softened to balance it.

Grounding: charcoal
A deep note at L* 28, 30 points from the 58 of Honeygrain, so a rug keeps its edge.

Matte black
Black works with every undertone; beside Honeygrain at LRV 26 it gives the room its outline.

Aged brass
A warm metal that agrees with the golden undertone of Honeygrain (hue 79°).

Unlacquered brass
Left unsealed, it darkens with handling to a softer warm tone beside Greek Villa walls.

ROOM BY ROOM

- **Living room** Greek Villa walls and Alabaster trim, a linen rug with a charcoal edge on Honeygrain, a coffee table in a mid brown wood.
- **Kitchen** Wrought Iron on the island, Alabaster cabinets above, matte black pulls, Honeygrain underfoot.
- **Dining room** A table in a mid brown wood on Honeygrain, chairs in a pale, bleached wood, aged brass pendants.
- **Bedroom** Simply White walls, linen linen, a graphite quilt, unlacquered brass on the lamps.

WHAT TO AVOID

- Walls at the lightness of Honeygrain: Evergreen Fog (Sherwin-Williams SW 9130, LRV 30.4) sits 5 points from its LRV of 26, so wall and floor would blur into one.
- Wood that almost matches Honeygrain: a tone like our Silvered Gray sample, 5.4 apart (CIEDE2000), reads as a near miss. Go clearly darker or lighter.
- Walls that lean yellow: yellow on yellow flattens the golden undertone of Honeygrain (hue 79°).

THE ROOM IT SUITS

At LRV 26, Honeygrain is a mid tone: it holds its color in a sunny room and hides everyday dust and pet hair better than a very dark or very light floor.

At 5 inches a board, Honeygrain lays about 29 boards across a 12 foot room.

Solid hardwood: living spaces and bedrooms above grade, kept out of baths and basements.

Hardness: White oak: Janka 1,360 lbf

Construction: Solid white oak hardwood

Finish: PPG Ultra Low Gloss Finish
