Sonia Marble in a coastal room

Sonia Marble from the COREtec CT Plus Tile line is a very light vinyl tile with almost no undertone, measured from its own picture with LRV 65. Here it is with Evergreen Fog walls, Extra White trim, and Hale Navy as the deep note, chosen by the numbers.

THE PALETTE

THE FLOOR	WALLS	TRIM	DEEP NOTE	WOOD
Sonia Marble	**Evergreen Fog**	**Extra White**	**Hale Navy**	**A pale, bleached wood**
LRV 65	Sherwin-Williams SW 9130 LRV 30.4	Sherwin-Williams SW 7006 LRV 85.9	Benjamin Moore HC-154 LRV 8.4	Like our Natural stain sample

WALLS, TRIM AND CABINETS

WALLS
Evergreen Fog
Sherwin-Williams SW 9130 · LRV 30.4 · -35 from the floor
A soft, cool leaning color (hue 116°) that keeps Sonia Marble crisp and gray.

OR WALLS
Chantilly Lace
Benjamin Moore OC-65 · LRV 90 · +25 from the floor
A clean neutral (chroma 2.7) that keeps Sonia Marble crisp and gray.

TRIM AND CEILINGS
Extra White
Sherwin-Williams SW 7006 · LRV 85.9 · +21 from the floor
21 points over Sonia Marble in LRV, a clean white (chroma 2.6) that keeps Sonia Marble crisp.

THE DEEP NOTE
Hale Navy
Benjamin Moore HC-154 · LRV 8.4 · -57 from the floor
Deep and quiet, 57 points darker than Sonia Marble in LRV, a frame for a gray floor.

Lower cabinets or an island in Hale Navy, uppers and trim in Extra White. The floor at LRV 65 sits between the two (8 and 86).

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
65	85	Gray	107°

A near gray, with almost no warmth. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Sonia Marble is lighter than 98 percent of the 1,197 vinyl floors we carry, measured the same way, and warmer than 3 percent of them.

WOOD, RUGS AND METALS

A step darker: a pale, bleached wood
About 18 points darker than Sonia Marble in L* (67 against 85), far enough to read as a choice. Like our Natural stain sample.

A step lighter: black or painted pieces
Sonia Marble is lighter than any wood stain we photographed (L* 85), so contrast comes from black, painted or upholstered pieces.

Tone on tone: pewter
1 in chroma, half the warmth of Sonia Marble (2), and 34 points darker in L*.

Across the wheel: slate blue
Hue 287°, straight across the color wheel from the 107° of Sonia Marble, softened to balance it.

Grounding: smoke
A deep note at L* 55, 30 points from the 85 of Sonia Marble, so a rug keeps its edge.

Polished nickel
A bright nickel with a touch of warmth, for the gray undertone of Sonia Marble (chroma 2.0).

Chrome
The brightest and coolest finish, crisp against Sonia Marble at chroma 2.0.

Matte black
Black works with every undertone; beside Sonia Marble at LRV 65 it gives the room its outline.

ROOM BY ROOM

- **Living room** Evergreen Fog walls and Extra White trim, a pewter rug in a flat weave on Sonia Marble, slate blue pillows, black or painted side tables.
- **Kitchen** Extra White cabinets with an island in Hale Navy, polished nickel hardware, Sonia Marble underfoot.
- **Bedroom** Chantilly Lace walls, pewter linen, a slate blue throw, chrome on the lamps.
- **Bath** Hale Navy on the vanity, Extra White walls, a smoke mat, matte black fixtures.

WHAT TO AVOID

- Walls at the lightness of Sonia Marble: Balboa Mist (Benjamin Moore OC-27, LRV 65.5) sits within a point of its LRV of 65, so wall and floor would blur into one.
- Whites that lean yellow: beside Sonia Marble, a near gray, they look dingy.

THE ROOM IT SUITS

At LRV 65, Sonia Marble is very light: it bounces light back into the room, suits north facing rooms, basements and small rooms, and shows dark grit more than lint.

At 12 inches a tile, a 12 foot room is about 12 tiles across.

Sonia Marble is waterproof, so it belongs in kitchens, baths, mudrooms and basements as well as living spaces.

Wear layer: 20 mil

Core: WPC, a wood plastic composite core

Finish: UV Acrylic
