Weathered Stone in a Japandi room

Weathered Stone from the Mullican Chatelaine 5" White Oak line is a mid tone white oak hardwood with a soft greige undertone (LRV 28, measured from its own picture). Here it is with Modern Gray walls, Alabaster trim, and Tricorn Black as the deep note, chosen by the numbers.

WALLS, TRIM AND CABINETS

WALLS
Modern Gray
Sherwin-Williams SW 7632 · LRV 62.5 · +34 from the floor
A warm white or greige in the same soft family as Weathered Stone (hue 82° against its 95°).

OR WALLS
Edgecomb Gray
Benjamin Moore HC-173 · LRV 63.1 · +35 from the floor
A warm white or greige in the same soft family as Weathered Stone (hue 94° against its 95°).

TRIM AND CEILINGS
Alabaster
Sherwin-Williams SW 7008 · LRV 82.2 · +54 from the floor
54 points over Weathered Stone in LRV and warm enough (chroma 5.3) to read white, not blue, beside its greige undertone.

THE DEEP NOTE
Tricorn Black
Sherwin-Williams SW 6258 · LRV 2.8 · -26 from the floor
Deep and quiet, 26 points darker than Weathered Stone in LRV, a frame for a greige floor.

Lower cabinets or an island in Tricorn Black, uppers and trim in Alabaster. The floor at LRV 28 sits between the two (3 and 82).

THE FLOOR, MEASURED

LRV	LIGHTNESS L*	UNDERTONE	HUE
28	**60**	**Greige**	**95°**

A greige: soft gray with a little warmth. LRV is light reflectance value: 0 is black, 100 is white. A wall within 30 points of the floor blurs into it (BS 8300).

Weathered Stone is lighter than 67 percent of the 1,739 hardwood floors we carry, measured the same way, and warmer than 7 percent of them.

WOOD, RUGS AND METALS

A step darker: a mid brown wood
About 19 points darker than Weathered Stone in L* (42 against 60), far enough to read as a choice. Like our Aged Barrel stain sample.

A step lighter: a pale, bleached wood
About 11 points lighter than Weathered Stone in L* (72 against 60). Like our Country White stain sample.

Tone on tone: ivory
5 in chroma, half the warmth of Weathered Stone (11), and 28 points lighter in L*.

Across the wheel: graphite
Hue 275°, straight across the color wheel from the 95° of Weathered Stone, softened to balance it.

Grounding: charcoal
A deep note at L* 30, 30 points from the 60 of Weathered Stone, so a rug keeps its edge.

Matte black
Black works with every undertone; beside Weathered Stone at LRV 28 it gives the room its outline.

Champagne bronze
A warm metal that agrees with the greige undertone of Weathered Stone (hue 95°).

Brushed nickel
A soft satin nickel, quieter than chrome, for the greige of Weathered Stone.

ROOM BY ROOM

- **Living room** Modern Gray walls and Alabaster trim, a low table in a pale, bleached wood on Weathered Stone, an ivory rug, one graphite cushion.
- **Kitchen** Alabaster cabinets, Tricorn Black on the island or one wall, matte black pulls, Weathered Stone underfoot.
- **Bedroom** Edgecomb Gray walls, a low bed in a mid brown wood, ivory linen, champagne bronze in small doses.
- **Entry** A bench in a pale, bleached wood, a charcoal mat on Weathered Stone, brushed nickel hooks.

WHAT TO AVOID

- Walls at the lightness of Weathered Stone: Evergreen Fog (Sherwin-Williams SW 9130, LRV 30.4) sits 2 points from its LRV of 28, so wall and floor would blur into one.
- Stark blue whites everywhere: a greige floor like Weathered Stone turns muddy beside them. Keep the whites a little warm.

THE ROOM IT SUITS

At LRV 28, Weathered Stone is a mid tone: it holds its color in a sunny room and hides everyday dust and pet hair better than a very dark or very light floor.

At 5 inches a board, Weathered Stone lays about 29 boards across a 12 foot room.

Solid hardwood: living spaces and bedrooms above grade, kept out of baths and basements.

Hardness: White oak: Janka 1,360 lbf

Construction: Solid oak hardwood

Finish: Aluminum Oxide Finish
